MESSAGE OF SECRETARY

Another year 2021-22 for HAMS which was full of opportunities to serve the people of Odisha in a much better way with close contact with the grass root level . Time has come to keep in mind the fact that all the Non-government organizations (NGOs) are not the volunteer organization, but all volunteer organizations are Non-government organizations. Volunteer organization sector is only a very small part of very vast NGO sector. This report given an account of another year of energetic effort "HAMS" all through the year. The understanding about voluntary organization and Non-government organizations need a special deliberation keeping in mind the development of rural India as well that of urban India.

The challenges for the country is how to make the development and growth more inclusive. As I look at our rural areas, most of the people are denied of the basics- through the Nutrition, Health, Education, Gender discrimination, Drinking water, Sanitation, Energy Agriculture & Environment etc. gone are those days when for development there was the absolute necessity of criticism, complain, condemn, etc but now development solely depends on collaboration, cooperation and even constructive criticism with all positive attitudes. Voluntary sector needs further improvement and all acceptable coordinated efforts for the nation as a whole. This has resulted in the resign discontent, and simmering resident in the land of rich resources, they languish in abysmal poverty and marginalization.

It is to be seen that during plan period whether all the cherished objectives will be achieved and the benefits will reach the poorest of the poor. The only way to make the development and growth inclusive is to ensure the basic entitlements to every citizen. and these are in conformity with the constitutional right and some of recent progressive laws and policies such as Entrepreneurship Development Programme Food & Agri. Processing, Health, Sanitation, Computer Hardware, Software, Digital Awareness, Agriculture, Hotel Management for SC & ST, & Horticulture a few others which are to be debated & legislated. All these require a strong governance system by the communities themselves but these tragedy in this country that the governance system is continuing to be weak and most services are not available on the ground, teachers are not found in the school and doctors don't root the rural health centre. The food security baskets have many holes. Indeed, a very pathetic situation prevails in our areas.

We have been conscious of our role as a civil society organization in the national agenda for inclusive development. We have always extended our hands of cooperation and collaboration with the govt initiatives. We have been mobilizing the community to maximize the benefits on the Entrepreneurship Development Programme Food & Agri. Processing, Health, Sanitation, Computer Hardware, Software, Digital Awareness, Agriculture, Hotel Management for SC & ST, & Horticulture. These are opportunities for the rural communities to come up and demand their rightful place in the country as equal citizens.

With heartfelt thanks.

SECRETARY
HAMS, NAYAGARH
