1. Background information on Margadarshi Society

Margadarshi began on 14th April 2002 its work with street children on railway platforms of Gulbarga (now renamed Kalaburagi). It has been involved in many projects (in collaboration with the state government, independently as well as with other networks) addressing the issues of street children and child labour. It has also been part of various studies involving this crucial issue. Mr. Anand Raj, the Project Leader, has been active in many networks and forums engaging with the state for the protection of the rights of children. He has also contributed significantly towards improving the quality of management of many state-run children's homes in the district in the capacity of Chairperson/Member of the District Child Welfare Committee of Gulbarga. In the CRY operational area, and CHILDLINE project Margadarshi has brought significant improvement by ensuring access to sponsorship programs under ICPS (Integrated Child Protection Scheme) to children of single parents/orphan; re-enrollment of dropouts and child labourers in schools and hostels; approve of a high school after three years of advocacy; improvement of infrastructure/facilities in Anganwadi centres providing pre-school education and supplementary nutritional under ICDS (Integrated Child Development Scheme) and schools; formed School Development and Management Committees (SDMCs) in schools.

Problem Statement:

Margadarshi is working in Chittapur, Sedam, Chincholli, Aland and Gulbarga taluka of the Gulbarga (Kalaburagi) district. Kalaburagi is considered as one of the most backward districts in the state of Karnataka. About 28% of the population in the district belongs to the socio-economically marginalized dalit community. The child rights situation is also poor in all the seven Talukas. The state is closing down schools in the district for the rationalization of resources and utilization. Karnataka has the second highest child labourers in 10-14 year old age-group in India as per 2011 census. Children are compelled to work as bonded labourers in landlord's agricultural firms/ houses or looking after cattle when their parents are not able to repay the amount of loans taken from the landlord. Elder children have to support their family in this time of crisis situation. Children aged 12 to 18 years old are involved in domestic work, quarry, cotton picking, cattle grazing, and agriculture and facing different risks like accidents while carrying loads in quarry work; get affected with Asthma in cotton picking work etc. Besides, children are also working as a part of a gang to dig and load sand; in hotels / bars in different capacities; driving tractors for owners or for rent; begging; rag picking and other seasonal agricultural work. Girls are perceived better at seed crossing, pollination, cotton picking, and chile picking since a lot of them are short in height and do the work more effectively. There is an access gap of 47% in primary schools by standards set by the RCFCE Act (Right of Children to Free and Compulsory Education Act, 2009). And, there are only 4 government high schools for Grades 9 and 10 in the project area. The infrastructure situation is poor in these schools. While 16 schools do not have toilets, some schools do not even have drinking water. Major reasons for drop out in the area are poverty, search for survival needs, lack of access to school, safety and security concerns of adolescent girls, migration of parents, low educational attainment of parents, single parents or orphans with no care takers, health crisis in families and other problems in the family. Thus, dropout is influenced by a complex maze of factors from school environment to socio-economic and socio-psychological factors.

Whether we accept it or not "Street children, Unaccompanied Children, Malnourished Children, Missing Children, and Working Children or Child labourers, Child marriage" are a reality and are happening only among weaker sections of our society since they are more vulnerable and easily prone to exploitation, harassment, abuse and diseases. They are seen as untouchables by the public, deprived of love, affection, care and are forced to live in un-hygienic living conditions. In addition, majority of these young children are at risk of addictions due to unavoidable and realistic reasons which they have undergone in their life such as broken families, ill-treatment by parents or family members, company of bad peers, influence of elder or

senior street children, to pass time, to forget the past or sad part of their life and to live in a dream world than the existing world.. Margadarshi Society®, a non-profit organization is working for these marginalized and neglected children and registered under The Societies Act, came into existence in the year 2002. The society works for the children without any discrimination of caste, creed or color and brings them to the mainstream of the society by providing them with education, and necessary support. The society has been working for the past 16 years in the district of Kalaburagi.

Vision

“Margadarshi” envisages a child-friendly and sustained society, “where children are free from all forms of abuse, exploitation, malnutrition, enjoying childhood and their rights, live with respect and dignity and social justice without any discrimination”.

Mission

To make Kalaburagi as a model district ensuring child right for children in difficult condition by sensitizing and empowering children, youth, parents, caring community groups and making the civil society, government and allied systems and corporate accountable towards the development of children through promoting alternate care, networking, advocacy and lobbying and right based approach.

Objectives:

- To rescue and resettlement of children on the Kalaburagi Railway Platform who are separated from the families.
- To enhance the quality of lives of the children seen on railway platforms, (out of homes) through non-formal education, psychological support, and nurture.
- Research to understand the complex issues connected with rehabilitation.
- Reinforce self-identity, confidence in their abilities, and affection with family to overcome isolation from family, through orientation camps.
- Create awareness among the children, public, authorities and other organizations regarding the dangers of trafficking, physical and sexual abuse child marriage and ways of combating and preventing of the same.
- Lobby with Govt. Child Welfare Dept., Education Dept, Police Dept., Railway Authorities and Organization working with the children to protect the child rights and child issues through forming local committees.
-

Long-term Objectives of Margadarshi Society

The overarching objective of the society is to reunite the children living on the rail platforms with their parents and families with an emphasis on preventing the children, giving no formal training to most vulnerable children once they are resettled, to revert to their homes. Emphasis is also given to preventing of trafficking among children living on their own on the streets.

Intruduction

Homeless persons queue up at the back door of the shelter home from 4:00 PM for a carefully formatted intake and registration process. They must show a state-issued identification card, and those do not have identity card are also provided shelter after some questioning after ascertaining their authenticity. Each person’s data is entered into our database to help us determine who is using the program and how often.

Writes one grateful neighbour: *"For moments each night, if I am fortunate, I sleep not as homeless in the street, but with warmth and friendship, Margadarshi. Somewhere during the evenings of friendly faces, showers, videos and jokes, laughs and I was transformed from homeless to someone with a misfortune. I no longer view the world from ground level, where each may look down on me. I view the world from ground zero, where each may view my launch. "I thank you, all who volunteer for this program. You have given me fortitude, I am sure that I am not alone in this."*

1. Rapid Survey: Details of Rapid Survey:

Margararshi Society conducts Rapid Survey 2 times in a month in the 7 places mentioned below. The objective is to find the homeless citizens and get them to the night shelter by auto. We collect information about these persons and counsel them and find out the reasons for them being away from home. We provide Society Identity Card to these homeless citizens.

During this year we have conducted 24 rapid surveys and we found 206 urban homeless citizens. 59 persons are getting services of the Margadarshi Society Night Shelter. Overall, 340 old urban homeless citizens are also taking the benefits of the night shelter facility.

2. Epilogue

The increased population, unemployment, shortage of food security, starvation, many have become shelter less, wandering in roads is a common sight of our country. People are also suffering with family disputes, unemployment, alcoholism & dispute because of family assets sharing. The costs of food grains reached sky and therefore many families have come to road. For many reasons they left their homes and came to cities and took shelter in shops, bus stands, side of the road, temples and other places. The Supreme Court has ordered to provide some sort of shelter to such people. Accordingly the Karnataka state government Corporations has opened homeless shelters. The Government through Non-government offices, taking such facilities of night shelters to its homeless citizens to give them a kind of shelter. It may not be outset to mention that through such night shelters running in Kalaburagi District and many refugees have been assisted.

3. PROGRAMS

1. Rapid Survey from April 2024 to March 2025

Every month the rapid survey has been done for twice. We bring the people who were found in rapid survey, to our Margadarshi Society Refugees Night Shelter, Gunj, through vehicles. We admit them by taking their absolute information in the Admission Register and we also take their photographs. And everybody will be

given an Identity Card o from Night Shelter and every month with all the details a report would be submitted to Corporation office.

1. Bbriefly about the impact of enhanced organizational efficiency

Through Rebuild funding we have appointed well qualified and experienced staff. They are now able to manage all the programs effectively and are able to write proposals and in that we have received two new projects taken within two years. We were also able to provide very good staff capacity building training, update the social media from time which organization organized. Our organization received Certificate of Achievement in the Digital Presence is awarded by INGO for the best image in the activity section from Jan 15 to Feb 11, 2025. Through Mahatma Gandhi National Rural Employment Guarantee Act our project has provided an opportunity of earning livelihood for 296 meti (work) groups (each 20 members of BPL family) to under this scheme to reduce the migration, recharge the ground water which will be helpful for farmers for better agriculture yields, which will in turn help the farmers to live a dignified life.

We have stopped 698 child marriages in the villages, from June 2024 to 13th March 2025 in both the district of Kalaburagi & Yagagiri.

Also rescued the child labours to the tune of 112. We have also mainstreamed 265 school dropouts from our target village of Kalaburagi district.

As our project was very much concerned about the school drop children along with seasonal migrating families, we have taken up the vulnerability assessment through the door to door survey of our 5092 children target villages to have an idea of total number of school drops migration, never enrolled, children are 872 & planning to work for their betterment in the days to come.

Founded: 2002 | Headquarters: Kalaburagi, Karnataka | Geographical Focus: Karnataka | Referred by: Dhvani Foundation | Budget 21-22: INR 1.52 Cr (USD 198 K) | Lives impacted: 8,000+

Organization Overview

FCRA

12 A

80G

Margadarshi Society was set up to protect and promote children’s rights in the Kalaburagi district of Karnataka, which is considered to be among the most backward regions in the state. 25% of the district’s population belongs to Scheduled Castes. The organization works with runaway, Child Marriage, Childlabour, & abused Dalit children from the ages of 0-18 years via rescue and rehabilitation, and in the allied themes of education, malnutrition and disability.

Lived Experience and Inclusive Leadership

Margadarshi was founded and is run by Anandraj D Tavardar, a Dalit Christian who witnessed firsthand the discrimination that Dalit children face. The Board of the organization has ~30% women and ~30% Scheduled Caste members. The institutional leadership has 20% women, and 20% Scheduled Caste members.

Program Overview

Issues

Dalit children experiencing poor economic conditions, and neglect by parents due to migration, addiction and other causes often end up running away from home and becoming vulnerable to exploitation. Gender, caste based discrimination, lack of opportunity and public infrastructure all contribute to this.

Socio-economic: Seasonal agriculture and few livelihood options; poor school infrastructure and last mile delivery of health services; and high incidence of child marriage

Political and institutional: Low participation in local governance due to exclusion by upper castes; poor implementation of existing schemes

Geographical: High migration out of the district due to poor agriculture and low rainfall, leading to children feeling neglected

Agency and awareness: Minimal awareness of available schemes

Approach to work with communities

Margadarshi aims to create a child-friendly society where all children are free from abuse and exploitation. With staff primarily from the communities, they regularly run detailed surveys, and engage with diverse stakeholders at the district, Panchayat and community level to understand evolving needs of the children.

- 1 Conduct training and awareness programs regarding trafficking, abuse and child marriage
- 2 Identify and rescue missing children via the CHIDLINELINE helpline
- 3 Provide shelter, medical assistance, emotional counselling, and scholarships to rescued children
- 4 Minimize school dropouts by improving education quality and running bridge programs
- 5 Enable proper functioning of child protection committees
- 6 Enable community based rehabilitation of people with disability

1

From this project we have appointed staffs for maintain the Digital media, aswell as we have purchased the Goonajn Sawftware, and printed some handbill for awerness the margadarshi activities and for fund rising purpose. The staffs are helping for preparing the monthly reports, programme and fundrsisng.

in this programe we have taken three staffs one is manager assistant manager accountant for the mantance of accounts. We ave give different trainings fro staffs in diffrect acts like child marriage act, adolosent labour act. Capcity building for the staffs to work properly meaningfully.

7. Parents meeting

We have conducted parents meeting in 31 villages in the last six months, where 434 parents participated and others took part in the meeting and discussed issues like Child Marriage, Gujjarkey shaadi, Child labour Drop out children, Cleanness, Polio Vaccinations, Gender Discrimination, to send the children who are above 3 years to the Anganwadi Centers, Malnutrition and govt. Facilities, social security Schemes, women and Child Trafficking, importance of School, and education, Children’s Aims and need to support the children for discussion.

We had visited the Patana village collected information of the school dropout students & whom we have motivated go back to the school. We have explained them that education is very important to come up in life, we also conducted the mothers meeting and requested them not send their children to work but send them to school, so that children’s future be built up, other wise children become child labour for meager income.

8. Adolescent Parents Meetings:

The Parents meetings conducted in all most all the target communities of our operational area. The discussed topics covered were gender discrimination, Re-school Enrollment, Child Marriage Prevention, avoiding children becoming child labour, cleanliness, health & hygienic practices, locally available nutritive food, protection of children from bad habits & encouraging children to have better education to come up in life.

Some parents doesn’t allow their children to go to school and also adolescent girls they won’t attend the meetings, The First thing you need to know the cause of any problem and then find out the solution. Children are not sent to school because of fear of social environment, because of family poor conditions, child marriage, and there will be a fear in child’s mind and child will run away from home. In adolescent meeting our Director, Shri.Anandraj said that we should give them good and proper knowledge, so that they don’t attracted towards love and affection and get rid of negative thoughts about love and affection. There are some social workers like mother Teresa is a good inspiration for adolescent children.

13. Virtual interface meeting

Summary: - Interface meeting was held at the Divine Hospital. **Kumari Yashoda Katke, PSI** Brahmapur Police Station and **Doctor Dr. Chetan** arrived to the programme and Kishoris asked officers what to read, how to prepare, where to get training and how to develop our physical/mental development. **PSI Yashodha** answered the small questions of the children and also explained about their achievements. Conducting studies, joining the police department, doing social work, serving as an efficient officer as an honest officer, she is like a crown of pride for the women of Kalaburgi people.

We came to the program to show Kishoris a role model and take guidance from him to carry out social work like him. **Chetan** also got information about what to study and how to prepare if the children want to become a doctor, what subjects to study after the 10th standard, all these officers followed the path they had followed, the subjects they had studied hard and loved in the society.

He gave guidelines for children's great desire to become like us by imbibing dignity and respect. **Mr. Anand Raj**, director of the guidance institute, came and organized this consultation program with the authorities to get the facilities needed by the children and the officials, so the Kishoris came and took advantage of this program.

And the coordinator of the guidance institute and the community organizer participated in this program. Finally the program was concluded by singing the songs to the children and then Mrs. Vijayalakshmi gave a vote of thanks.

14. Adolescent girls by monthly meeting conducted

Sl. no	Name of village	No of meeting held	No of Adolescents benefitted
	TOTAL	222	4515

15. Summary: - In one year we had total 216 adolescents meetings and had reached total 4636 adolescents. We have taken up different topics for discussion in every month for adolescents. August: -- Constitution, September: -Discrimination, October: - Importance of education, November: - Casteism, December: - Personality development. The participated adolescents were given note books, pens & sweets after the meeting. They shared their problem and now they have become very friendly with us that they fell free to share anything they wanted.

In the said programme, the meeting began with Prayer; song sung by adolescent girls, welcomed all the participants and guests of the meeting. This month's agenda was goal & decision making. The discussed topics were, capacity, personality development, Interest, utilizing the existing opportunities, choosing right subject, goal oriented development, action plan/design, behavioural change and so on.

The Goal cannot be achieved in one day, A goal cannot be reached when learning by steps, short term goal & long term goal is a divided in two ways. How can I achieve my goal and sometimes the goal is not successful, the question is how to strive and how to achieve our goal.

➤ **Goal and decision**

1. Ability
2. Personality
3. Interest
4. Whenever opportunity comes based on our knowledge that should be exploited.
5. Our goal is to choose the right subject and we have to take decision to understand the good ideas related to the subject. It helps in achieving goal. Which subject will have to be taken, about that discuss the deeply. The goal orientated involves the development of an action plan designed to motivate and guide an individual or group toward a goal.
6. All should have goals, and by necessary preparation & attempts helps us to achieve our goals.

7. There would be at least five goals to achieve with different criteria
8. Goal setting is an important component of the personal development and management literature.
9. Goals can be time bound specific and achievable. Difficult & specific goals are just as significant as easy goals leading to higher performance. Or setting an abstract goal that forces people to do their best.
10. The non holding is constant. And because there is goal commitment, a high goal yields performance.
11. Affect influences behavior to the extent that people engage in specific difficult goal setting and subsequent commitment, such as praise feedback or participation in goal decision making.
12. Goals and decision how to set the target
13. Along term goal 5/10 years in duration.
14. Midterm goal duration in 1 year
15. Short term goal 6 month
16. It is said that the goal should be written down
17. You have think about your goals
18. Write your goals in detail
19. The benefit of achieving the goal should be known.
20. Every day you should think about achieving the goal in your mind

- **Specific – code**
- **Smart code**

S - Specific Clearly site your goals

M - Measureable ensure you can measure successes

A - Attainable set gals you know you Active

R - Relevant set goal relevant to your education

T - Time bound

S- Specific goals are well – befit and clean cut instead of I want to be better in school, a more specific Goal would be I want

M-Measurable a make goals easier to know how successful you are Instead of I will get in shape a Better goal would be I will be able to walk milk in less than 15 mints

A - Achievable goals set you up for success because they are goals you can realistically accomplish Improving your math grade and letters achievable raising grade from AD to a probably is not

R - Relevant setting, relevant goals ensure your working towards goals that are worth goals than Beating a video game score.

T - Time bound goals have definite a time or date that are to be accomplished completely & my Science project by Friday is more motivating than complete my science project.

17. Boys Club

We have initiated to make only boys club in some of villages. This suggestion come from Azim Premji annual Review time Mr.Mahadevappa and Mr.Sanjiv kulkarni have given suggation. Hence we made boys clubs separately because in the villages' boys' parents and teachers were asking to conduct boys meeting, why you are having with girls when it is most needed for boys. Our community organizer faces such questions in the community some times. From this reason we receive good support from boys.

- ❖ Discussed about the cleaning and discipline. You have to get up early in the morning and compulsory brush your teeth and pray to god and eat your breakfast and later you have to go to school every day.
- ❖ To the head of the family & elders, we need to obey & respect.
- ❖ Neet to help parents in household chores
- ❖ Respect your teachers and when they were teaching lister attentively & obey them. What they gave for home work should be completed.
- ❖ Respect your classmates, friends and girls.
- ❖ You should respect other girls like your own sisters.
- ❖ Study the life stories of Dr.Baba saheb Ambedakar and swami Vivekanand & read other news papers.

- ❖ Read our Indian women freedom fighter biography who are successful in every filed.
- ❖ What is your dream in your life, you have to try to achieve it & you reach your goal successfully.
- ❖ And personality development about given information.
- ❖ Finally vote of thanks & concluded the meeting.

Summary:-Community meetings were conducted for 28 villages and 244 parents were reached through the meetings. The total community members participated is 321 to whom we had explained them about the stopping of child marriage, at VCPC meeting and child labor. As in many villages the parents took their children to the farm for coolie work, we explained them that it not the right time for them to work but it's the time to study. In some villages the parents share the problems like Adhere card, BPL cards, Aayushman Bharat, labour card & Ghruha laxmicard issues in filling them. Our community organizer helped them in this regard.

21. Children and Parents meeting at Minagigi

At Minjgivillage on 19-01-2024 in the evining we have organized boys and parents meeting. In this meeting we asked children which food your father and mother like the most? And we asked the parents which food your child favourite? The next point we asked the parents what your daughter wants to be in their life? Some parents said my daughter wanted to become SP, DC, Teacher, Police Doctor and Engineer, and we asked the children what you want to be. The girls informed exact opposite to their parents. Now the parents came to know that children's aspiration is different from that of the parents. We asked the parents did you expectthis answer. The parents replied no, whether anybody discussed like this earlier? The parents and children said no. this is the first time you are asking this kind of questions. We are very happy and proud of our children, said the paretns.

Thank you very much for Margadarshi Society for interacting with children and you havecreated the vision of children. In this meeting school teachers were also present. Near about 20 children and parents were participated in this meeing.

22. Boys and Girls meeting

Si.no	Village	Girls and boys club/topic	Children
01	S.saradgi	Girls and boys club/ Equality	35
02	Khanadala	Good relationship between boys and girls	25

In these meeting girls and boys participated are same numbers $12+12=24$ sitting in two lanes, welcomes and the activities began.

- **1st Activity**

We gave white sheets and sketch pensto all children and asked them answers to questions

- 1) Write the names of your family members.
- 2) What is your favourite color?
- 3) What is your favourite food?
- 4) Which gamesyou like the most?

10 munities given to write the answers and when it finished, papers collected from all the children to check the answers written by them.

Community organizer said to children, I will put all your written papers in the box. Now I call one by one and take a paper from the box and introduce your friend's family members, saying brother & sister, instead of using their names. Thus each of you will have an opportunity to introduce your friend's family members, which you will never forget. The purpose of this activity is it builds good relationship introducing them and feeling like our own brothers & sisters.

- **2nd Activity questions**

- 1) What is your dream?
- 2) What are you most afraid of?
- 3) What you are more like?
- 5) What gives us happy matters?
- 6) What is the dream of your village?

Children's answers shared to every one for example some children said dreams like doctor, some said most afraid of snake, and teachers, some are more like festivals, flowers,sweets, dream of village, some are saying big school, big library, Good road &Garden.

- **3rd Activity**

- 1) We have said to children to clapfor 3 times. After that said to children to clap for 17 times and so on. Children were enjoying games.

- **4thActivity**

Community organizersaid to sit-downto one group of girls and to some of the boys we were asking some questions.

- 1) What are theproblemsAdolescent girls facing in village?
- 2) Who is the responsible of these problems?

- Questions/answer on child marriage issue
 - 1) Girls become dropout because parents are not giving importance to girl's education
 - 2) Bus won't come on time to reach school
 - 3) Poverty
 - 4) Hospital
 - 5) Ragging by boys
 Responsible, neighbors and police, village people, and doctors, parents, boys

- **5th Activity** Proverbs arguments

- 1) **The brain of girls is below the knee these proverbs are not accepted**

It is wrong to believe the old proverb, in this age women have achieved success in all fields. The proverb has been lied to. Male and female should not be discriminated. Equality to be maintained for boys and girls at all time and at all places.

- 2) Males won't cry & females not laughing, it may true to some extent.

Feelings are equal to both male & female but boys sad, emotions are rare because their feelings are not coming out, as they to cry & shed tears but secretly but males endures a lot. As for as females are concerned, they won't reduce crying & shedding tear openly. It may not be wrong. Women laugh like is a flower blooming. It is like positive energy in laughing. But boys do not consider girls laughing in positive manner. Crying and laughing is equal in nature both male female. We should not judge that boy should be like this and girls should be like that. Superstitions should not be believed at all by anyone.

5 After conducting of activities, children participated expressed their opinions are as under

- They enjoyed all the activities
- They felt very happy playing games
- They affirmed that they consider their classmates as their own brothers and sisters.

24. Case Study 01.

Name: Bharati
 Father name: Shamraya
 Mother: Umashree
 Sister: Mamata
 Caste: SC
 Village: Melakunda B
 Class: SSLC
 School: Government School, Melakunda B

Resone of drop out:

I went to Government School met the HM who briefed me about Bharati who is a school dropout. Receiving this information I visited Bharati's house, where I found her parents, brothers & sisters. I discussed about reason for dropout and where I came to know that parents are poor and are working in bricks making unit at nearby states like Maharashtra & other big cities. Father was a drunkard and there would be fighting among parents as the family took loans and however they work, are unable to repay the debts. Thus parents took Bharati along with them and made her to work for extra wages. However, I took the opportunity of counselling this family and explained the importance of education and getting job later. I also explained the parents that their daughter should not work as labour but get some respectful job and earn better and her future would be brighter, if given education. Thus in three to four attempts of counselling, parents convinced and agreed to send their girl to school. Now Bharti is continuing her education being regular to school.

Case Study 02

Name: Shruti
Father: Hanamant
Mother: Mallamma
Brother: Vinod
Sister: Bhagyashree
School: Shree Sevaniketan High School
Village: Melkunda B
Caste: SC
Class: SSLC
Age: 16 Yrs
Reason of the drop out: poverty

I went to Sevaniketan school met the HM who briefed me about Shruti who is a school dropout. On receiving this information, I visited the family and discussed with parents at length. I came to know that Shruti's family is poor & her elder sister got married and to arrange her elder sister's marriage, parents took huge loan. As this family is also a seasonal migrant to nearby states for their livelihood and they need to keep a person to take care of their house. Thus parents forced Shruti to be at home for overseeing. I explained the importance of education and getting a job later. Now a days, even girls are making records in studies, getting jobs & later caring their parents with best amenities possible. Gradually the parents convinced and agreed to send their girl to school. Now Shruti is continuing her studies and regular to school.

Case Study 03

Name: Radhika
Father: Nagappa
Mother: Suramma
Brother : Vinod
Sister: Monica
School: Shree Sevaniketan High School
Village: Melkunda B
Caste: SC
Class: SSLC
Age: 16 Yrs
Reason for the drop out: School dropout for the last 3 months, re-enrolling.

Reason: On my visit to school, I received the information of school drop list, from which, I came to know about Radhika. This girl fell in love with her classmate, which was known in her family and in school, which created a problem. Hence she left school for a period of 3 months and staying at home. I went to the parents of girl and convinced them to send their girl to school, as she is studying in tenth standard which is a turning point in her life. Counseled the boy too not to indulge in such activity, which hampers his study and future, for which he too agreed and parents thus pacified on both the sides. Later Radhika started attending school and now she is regular to it.

Case Study 04

Name: Laxmi
Father: Chandrakanth
Mother: Bharatbai
Brother : Bhima
Sister: Nil
School: Shree Sevaniketan High School
Village: Melkunda B
Caste: Kuruba
Class: SSLC
Age: 15 Yrs

Reason of the drop out: To work in their own land, due to shortage of labourers, her parents forced her to discontinue school.

Reason: On my visit to school, I received the information of school drops from Head Master, from which, I came to know about Laxmi, whose parents have their own agriculture land and there was shortage of daily wage labourers to work in the land. Without the labourers, the growing vegetables were drying. Hence to take care of this and watering to vegetables, Laxmi's parents forced her to leave school and made her to work in the field. On visiting Laxmi's parents, I tried my level best to make them to understand, how important the education is. Now she is in SSLC, which is a turning point in her life and later she may go for higher education, which gives her best future. Parents agreed to my view and agreed to send their daughter to school. Thus Laxmi now is continuing her studies and regular to school.

Success Story 05

Name: Pushpa
Father: Vithal
Mother: Bhimabai
Brother : Shriram & Nagaraj
Sister: Priya
College: Govt Girls College, Kalaburagi
Village: Khanadal
Caste: SC
Class: B.A 1st year
Age: 19 Yrs

Once upon a time, Pushpa, who is a resident of Khanadal village, was one of the regular attendants of Adolescent girls' monthly meetings, through which she was receiving much awareness. It was like a personality development for her. She equipped herself with increased general knowledge and wanted to serve, being herself very poor in the village. She belongs to a very poor family and her father alone was earning through daily wage earning, which was not at all sufficient. Father was also not in a position to support his daughter's education. Somehow days were pulling and during our home visits, to our community organizer, her mother expressed her family situation and requested us to help her out with a job, so that the family can meet their essentials. This mother was crying because of the family conditions, father was consuming alcohol now and then which also deteriorated family condition to further. Thus there was a need of job to this Pushpa, which could be a great help to this family. After heeding to the plea made by Pushpa's mother, our community organizer Jayamala assured to help her to have job.

Our community organizer in her routine visits to village library and veterinary hospital, she met the veterinary doctor and enquired about availability of jobs, if any. To this, the doctor said that they have a vacancy in their veterinary hospital. Then our community organizer recommended Pushpa's name, which is in badly need of a job because of her family conditions. Thus our community organizer was in touch with veterinary hospital and visiting regularly. After 2 months, the veterinary hospital announced that they are in need of Pashu Sakhi and Krushi Sakhi. Pushpa was made to apply for Pashu Sakhi post. By God's grace she was selected and started working. Some jealous people started telling to Pushpa, this is not a good job and you may not receive your salary after 3 months and may discontinue. You may better continue your B.A education and leave this job. Pushpa did not do so but continued in this job and has received 3 months salary at a time. She gave sweets to her all well-wishers and jealous people too. She is very grateful to our Community Organizer and Margadarshi Society, Kalaburagi, for their continuous support and guidance.

25. OLYMPIC GAMES

Introduction

Our Margadarshi Society is working for adolescent girls (less than 18 years) for the last 3 years. In these three years of period, they have been equipped with awareness on adolescents' health and hygienic practices, education, skill development, personality development and so on. Especially the school dropouts have been found out and have been re-enrolled into the mainstream. For these children a Special Programme has been organized, to encourage and to sharpen their individual hidden talents. This programme is called Olympic Games.

For the special programme our organization has planned for the 7 days before conducting this special programme. On 27th June, 2024, all the concerned government departments were specially invited. Before this special request letter has been submitted to BEO seeking their permission to conduct such a programme and also permission was also taken for conducting the same at District Stadium.

The BEO was also

requested to help us by providing Physical teachers to conduct the said programme. Later on 11th July 2024, the play materials required to conduct the special programme were purchased.

Before conducting the special programme, on 12th July 2024, a meeting was convened for six teachers, taluka Physical Education Officers & Director Margadarshi Society, for discussing how to conduct the games like Khokho, Relay, Running, Lemon & spoon, Musical chair, Short Put & Skipping and also discussed how take care of 250 participants who were coming from 40 selected target communities. On 13th July 2024 the special Olympic Games were conducted at district stadium. To this special programme around 20 special guests from government departments were invited and were kind enough to participate in the said programme. The Chief Guest

Shri.Vijaykumar Jamkhandi, BEO, South Zone, inaugurated the programme, Shri.Rajshaker Gonaik, District Physical Education Officer was the Chief Guest addressed the gathered and encouraged the students to participate well. Shri.Santhosh Diggi, Taluka Physical Education Supervisor, South Zone, was also present as special guest, who also addressed the gathered children to play well and to win prizes.

The guests mentioned in the below letter were all present and actively participated and encouraged students to play well.

On 13th July 2024, by 10.30am the special programme Olympic Games was commenced. This programme was inaugurated by all the guests and a sport light was kindled. Anchoring was done by Ms.Priyanka,

Community Organizer. The guests on the dais were garlanded, spoke well and encouraged all participants. Thus programme was commended and actual sports commenced. Before starting the sports all the participants including invitees took the promise/oath saying that we the participants of this special Olympic games we put our best efforts in conducting & encouraging the participants and we abide by the rules there of though this oath.

We had reached 50 villages and around 12,000 people at the same time.

13. Akshaya Tritriya

28th April for the awareness of Child marriage we had a press met and informed all the media to give awareness to stop child marriage as on 30th April was **Akshaya Tritriya** which was a special Muhurat for Hindus , Its said that on this day they get a special blessing from god and . It’s believed that on this day “the entire God visit earth from heaven “just to bless people on earth, so many people do marriages on this day.

So to just stop this we asked all the media to give awareness for stopping child marriage, at the same time we visited all the Holly places like Temples, Church, Masjid and Gurudwara and others and met the faith leaders and said them to check the age of every child before the do marriage, as they are the main persons who perform marriage in every religion.

14. Child marriage

In the academic year we had stopped 367 child marriage and engagements and also rescued the girl from the evil of child marriage a gave awareness to the parents of the girl and informed them that doing child marriage is crime and you have to face many problems, as well the child has to face both physical and mental problem, the correct age for marriage is 18 for a girl and 21 for a boy.

15. Child labor

In the years of 2024-0225 we have rescued 45 children from labor work we found them working in different places, we also noticed that they were school dropout and some have migrated from different places in search of job from their native places, just to take care of their families.

16. Case study : 01

Case type Child marriage

Dated : 7th April As we came to know about the child marriage on our phone call 1098 we visited the village with child line staff , Super visor , Angawadi teacher and Margadarshi Society Team member Priyanaka visited the house of the boy where she was found, when the caller said that the girl was married one week before in the and now the girl **Bhagyashree** is staying in her husband's house and as she is already married she was not able to go to her parents house as she was forced to marry the boy who was a relative of the girl **Bhagyashree** .

Child name : **Bhagyashree**
 Age: **16 year**
 Father name: **Late Sidram**
 Mother name : **Shantu**
 Address: **Duttargaon Tq: Aland**
 Dist: **Kalaburgi**

On visiting the house of the **Bhagyashree** husband, we first spoke to her father -in-law regarding the child marriage why have they do so the father-in-law said that the girl **Bhagyashree** was in love with the boy who had nothing to do in his life he was a waste body in the village , he always wanted to waste time here and their s and he had taken hand loan from the people of the village saying that as soon he gets married to **Bhagyashree** and it as will pay as she below to rich family and she was the only daughter in the family and she was the only child for her parents , knowing the family background of the family he had fallen love with her and always said that he will do good business as her parents give him money, for which the parents of **Bhagyashree** disagreed .

And then the parents of **Bhagyashree** said that they keep their daughter at home life long but not give him, and when one of the relavte of **Bhagyashree** came to know about the problem of **Bhagyashree's** parents they said that we marry your daughter to our 2nd son in our family and keep her happy.

So the parents of **Bhagyashree** agreed for the marriage and did a very simple marriage with both the family with just 15 people at the temple in the village.

Knowing this the boy friend of **Bhagyashree** gave a call on 1098 for child marriage.

We then explained both the families that caring about their daughter is very good but doing child marriage is wrong, so we have to take **Bhagyashree** with us to CWC office and shelter her until the girl **Bhagyashree** becomes of the age of 18 years .

Case story: 2.

Case type Child marriage Dated 8th April

As we came to know about the child marriage on our phone call 1098 we visited the village with child line staff, Super visor, Angawadi teacher and Margadarshi Society Team member Priyanaka visited the house of the boy where she was found, when the caller said that the girl was married one week before in the and now the girl **Gayathri** was married in the month of February and was sent to her husband's hour and for month the we didn't get any information regarding the child marriage case.

Child Name: **Gayathri**
 Age : **15Yrs**
 Father: **Narasing Ravi Thorkade**
 Child Parents Address: **Katak Chincholi**
Balki Taluku Bidar
 Husband: **Sharanu/Father:Dathadtre**
Chowhan (Dattu chwahan Mother: Nirmala
byii
 Child Present Address: **Ramthirth Temple**
Back Side Ayodhya nagar Kalburgi

But once in the month of April the girl Gayathri visited the house of her parents and the caller had called on 1098 and gave information about the child marriage. And when we got the information about the child marriage we had visited the house of the **Gayathri** where is was sitting with her parents and was telling that she didn't like the boy and now she will not return back to her in-laws house .

When we heard this we asked what was the problem and why you people had done child marriage, the parents of **Gayathri** explained us that the girl was in love with her husband , to whom she was married , the girl **Gayathri** had seen the boy in one of the other marriage and fall in love and said to her parents that she will marry only this boy or else not , on eyeing this the parents of the girl **Gayathri** also agreed for this as the boy was well shelled in his life and bothe the family didn't have any objection regarding this marriage .
 But after the marriage the gril was not happy with the boy as her use to stay in Bangalore for job and he left the girl **Gayathri** with his parents at Gulbarga for taking care of them , which she didn't like , nor like she just wanted to stay with her husband in a spilt family and not in a joint family.
 She also said that just because her husband was working in Bangalore she wanted to marry him as he stayed in a metro city and wanted to enjoy life and do nothing in life .
 Listing to all the matter we explained that what she is thinking is wrong , and first a fall she has got child marriage which was against rules of Government of India.

So we have to keep you at CWC (girls home) until you come to the age of 18 years. By this way we brought the gril **Gayathri** to Gulbarga to CWC office and shelter her for the further proceeding.

Child labor: 3.

Case Type: Child Labor

Child name : Ranjita

Father Name : Maheboob

Mothers Name : Suvarne

Address : Kesratgi Ashraya colony
Gulbarga

Age :- 7 years

Our Team member Priyanka's friend was working in Kesratgi area had heard that a small girl has been brought to Prostitute house in the same area of Kesratgi Ashraya colony and he informed us that a small girl has been kept in prostitute house as our team member got the information she called Director of Margadarshi Society Anandraj sir, Later he called the coordinator of child help line 1098 and we also informed to 112 police about the small girl has been seen at a prostitute house.

Seeing small girl in a prostitute house is quite common, but this small girl was locked in a room 24X7 and she was tortured by the lady who kept her.

When we visited the house of that lady the small girl was inside the house and the house was locked from outside when our Director tired to talk to the girl where is your mummy, she said that her mother was in Madhya Pradesh in a small village and she is with her other mother.

Listing to this the Director of Margadarshi Society, 1098 team and police broke the lock of the house and tried to enter the house to rescue the child, before we could enter the house the lady who stayed at house came there and started shouting at us and asked why are you people breaking the lock of my house and used haze works on us.

But after seeing the police she kept quiet and opened the door for us & when we entered the house we saw that the girl was in very bad condition our team member spoke to the child on talking to her we came to know that the child was from MP and her father had sold her to the lady, and since 5 months the girl was locked everyday in side when every day the lady went outside and she used to hit her very badly everyday and having sex with other men in front of the child and was asked to see everything was going on there.

The girl used to cry for food, but the lady gave very little food and said if you have been given more food you will make potty in the house and may the house dirty as the child cried for food the lady used to hit her very badly, once a men who had came with the lady tried to have sex with the child also but was saved by some other men there.

When we spoke to the lady there she said that the child is her sister's daughter and as her sister didn't have time to take care of the child so her father had brought her to Gulbarga to me.

Outcome.-

The lady and the men who stayed at the house of the lady were arrested and the child was taken immediately to hospital where the doctors give have treatment. Later the FIR was filed against the men and the lady and after 3 days of treatment at hospital the child was produced to CWC (girl home) for the further proceedings. We are trying to find out the parents of the child.

Executive Summary

The Vulnerability Assessment Report for Kalaburagi highlights critical issues concerning school dropouts, child labour, and migration among children in the region. The findings reveal a concerning dropout rate of 14.67% among children aged 6 to 18 years, with an alarming total of approximately 872 children likely out of school. Economic pressures significantly contribute to this trend, as many families prioritize immediate income over education. Among the children who dropped out, 59.72% are engaged in labour, primarily within agriculture and domestic work, highlighting the dire intersection of poverty and educational deprivation.

Error! Not a valid link.

Additionally, the assessment reveals that 95.90% of children are unaware of their rights, contributing to a culture of silence surrounding abuse and neglect, which often prevents children from seeking help. The limited presence of functional Child Protection Committees at just 8.54% further hampers protective measures.

To combat these issues, the report recommends targeted interventions focusing on promoting educational retention through community awareness initiatives, improved access to vocational training, and the establishment of support systems that address economic instability and ensure a safer environment for children. By tackling the root causes of school dropouts and child labour, stakeholders can create a more supportive environment for children's education and development in Kalaburagi.

2. Introduction

Commissioned by **Margarashi Society** and **Games24x7 Foundation**, this Vulnerability Assessment addresses socio-educational challenges for children in the block of Kalaburagi in Gulbarga district of Karnataka state. Margarashi, a local non-profit, combats child labor, early marriage, and abuse, while Games24x7 Foundation supports education and child safety. Together, they aim to improve educational access for vulnerable children. This assessment offers evidence-based insights for targeted interventions, fostering safer, equitable opportunities for children in the region.

2.1 Objective

The primary objective of this assessment is to identify and analyse barriers that hinder children's ability to pursue and continue their education in the district of Kalaburagi. By understanding these barriers, the study aims to:

2.1.1 Identify and Quantify Socio-Educational Vulnerabilities:

Determine the prevalence of factors impacting children's education, including family environment, child labour, early marriage, abuse, trafficking, and special needs. The assessment also examines migration patterns and family dynamics that influence school attendance.

2.1.2 Evaluate Educational Infrastructure and Accessibility:

Assess the adequacy and reach of educational facilities, including school accessibility, teacher-student ratios, and resources available for children with special needs in rural and urban settings.

2.1.3 Examine Literacy, Attendance and Dropout Rates:

Analyse literacy, attendance, and dropout rates by gender, and identify factors contributing to dropout rates. This objective also evaluates the impact of family and economic conditions on educational outcomes.

2.2 Scope

The assessment of 24 villages within the Kalaburagi block provides actionable insights for targeted program development in Kalaburagi, by focusing on these areas with implications for similar communities in the Karnataka region.

2.3 Methodology

A mixed-methods approach was used to gather and analyse data, ensuring a holistic understanding of the context and challenges children face in accessing education. The methodology includes:

2.3.1 Primary Data Collection: Primary data was gathered through surveys with Parents, caregivers, Household Heads (HH) and Focus Group Discussions (FGD) with school headmasters and teachers. Key informant interviews (KII) were also conducted with SDMC members

2.3.2 Data Analysis and Validation: Collected data was analysed using descriptive and inferential statistics. Triangulation techniques were employed to enhance data reliability, and findings were validated with community stakeholders to incorporate their feedback and ensure contextual accuracy.

This systematic approach enables Margarashi Society and Games24x7 Foundation to derive insights that are both statistically sound and reflective of community needs, setting a strong foundation for impactful interventions in Kalaburagi.

3. Demographics and Socio-Educational Context

3.1 Population Overview:

Total Population: The total target population is 23,177 from 5,481 Households of the 24 villages of Kalaburagi block of Gulbarga district of Karnataka state. Literacy and Schooling

• **Literacy Rate:** It is found in the survey that 85.33% of the children (5,071) out of 5,943 children) aged 6 to 18 years are currently enrolled in schools.

• **School Dropout Rate:** The overall dropout rate is 14.67% (872 out of 5943) of children in age group of 6 – 18 years dropped out, with 8.25% (491 out of 3076) of boys and 6.42% (381 out of 2867) of girls leaving school.

The Margadarshi team interacted with the headmasters of four schools of community Anakalgi, Itga, Khanadal and Yankanchi where high dropouts were recorded. As per the discussion with school Head Masters, the estimation of 25% children are school drops. The team went to cross check and had one to one conversation with school Head Masters who have agreed that 25% school drops existing in 24 villages, of 70 schools comes to 1750 (29.3%). It is assumed that there would be an average drop is 29.3%. The parents had not disclosed during survey about their children dropping out of school in the survey as they had the fear that their children would be sent to welfare homes instead of going to work.

Child Employment

Working Children: Out of the 872 children who dropped out of school, 59.72% (520) children are working, and they are engaged primarily in agriculture and domestic labour. Financial constraints in the family have forced the children into labor, affecting their education and development.

Early Childhood Education (ICDS)

ICDS Attendance: 63.48% (864 out of 1,361) of the children aged 6 – 8 years attended Integrated Child Development Services (ICDS) before Grade 1. Boys are slightly more (64.26%) than the girls' attendance in ICDS, with 64.26% among boys (462) and 62.62% among girls (402).

3.3 Migration Patterns:

14.89% families (816 out of 5481) have migrated in the last year, with 33.09% migrating for 1-3 months due to economic reasons.

Duration of Migration: Among those who migrated, most of them had shorter stays.

- 258 out of 816 families (31.62%) had migrated for less than 1 month.
- 270 families (33.09%) had migrated for 1-3 months while 14.83% families were away for 4-6 months.
- 167 families (20.47%) had migrated for over 6 months, indicating longer-term displacements for some families.
- Shorter migration periods imply temporary movement, possibly for seasonal work or immediate needs, while a smaller group requires longer-term relocation.

Reasons for Migration: The primary drivers were of economic, or livelihood related.

- 406 families (49.75%) had migrated in search of alternative livelihoods, reflecting the economic challenges present in their home areas.
- 305 families (37.38%) had moved to work in emergencies, indicating a reactive migration pattern in response to sudden financial needs.
- Seasonal migration accounted for 11.64% (95 families), suggesting a recurring need to find work outside of the local economy.
- Only 10 families (1.23%) had cited "other purposes," which may indicate reasons not directly tied to economic necessity.

Key Vulnerabilities and Risk Factors

1.1. Educational Barriers

- **School Dropout Rates:** A significant overall dropout rate of **14.67%**, higher among boys compared to girls, indicating that economic, social, or educational factors are driving students out of the system.
- **Early Workforce Participation: 59.72%** (in age group of 6 – 18 years, 310 out of 520) of dropouts, are engaged in the workforce, often due to financial pressures. This diverts children from school and creates a cycle of limited educational attainment and restricted job opportunities.
- **Birth Certificate Access: 11.46%** of children lack birth certificates, which could impede their access to public services, school enrolment, and later, legal identification. Lack of documentation is a barrier to consistent schooling.
- **Limited Early Childhood Education (ECE):36.52%** of children did not attend the Integrated Child Development Services (ICDS) before joining Grade 1. The absence of early childhood education can lead to delayed cognitive and social development, affecting school readiness and retention.
- **Disability:** Although only **0.74%** of children are reported to have a disability, those affected, particularly by multiple or mental disabilities, may face exclusion from mainstream education due to inadequate support systems, accessibility, and resources for special education.

1.2. Health and Nutrition

- **Limited Access to Early Childhood Nutrition Services:** It is noted that **36.52%** of children did not participate in ICDS, indicating gaps in access to critical early nutrition, health monitoring, and immunization that ICDS provides. Missing out on these services can lead to under nutrition, stunted growth, and increased susceptibility to infections.

- **Early Workforce Participation: 59.72%** of dropouts are working, often in environments that may expose them to health risks such as inadequate nutrition, long working hours, and unsafe conditions. Engaging in labor compromises both their nutritional intake and overall health.

1.3. Special Needs and Inclusive Education

- **Low Prevalence of Disability Identification and Support:** With 0.74% of children identified as having disabilities, under-reporting or lack of awareness might contribute to undiagnosed cases, especially among those in rural areas where access to diagnostic services is limited. The diversity of disabilities—including seeing (23.21%), speaking (17.86%), and mental disabilities (23.21%) demands a wide range of specialized support services, which may be lacking or inconsistent.
- **Social Stigma and Discrimination:** Stigma and bullying discourage attendance and participation, impacting children's self-esteem and family support for education.
- **Limited Access to Early Childhood Development Programs: 36.52%** of children missed pre-primary support through ICDS, which is crucial for building foundational skills.

1.4. Livelihood

- **Encourage Education and Skill Development:** Promoting education, especially among young earners, can help families improve their long term economic resilience. Skills training programs for the 19–25 age groups could increase earning potential.
- **Support for Diverse and Secondary Income Streams:** Encouraging households to diversify income sources or promote small business opportunities can reduce dependency on a single age group or individual for income. Secondary income source becomes essential.
- **Targeted Health and Employment Support:** Providing health coverage and employment support to older earners can help mitigate risks of income loss due to health or job instability.

Family and Community Environment

1.5. Family Stability - Household Economic Conditions & Support Systems:

- **Economic Hardships:** Many households face economic instability, as **14.55%** of children are engaging in work, indicating financial pressures that force children into labor rather than focusing solely on education.
- **Birth Registration and Early Development:** Although **88.54%** children possess birth certificates, there leaves a significant 11.46% children without legal documentation, which can hinder access to educational and social support services.
- **Early Childhood Development Programs:** Only **63.48%** children have attended ICDS before joining Grade 1, showing gap in early childhood care that can impact later educational outcomes.
- **Limited Vocational Training:** Among working children, only **5%** reported receiving vocational training, limiting their ability to pursue sustainable employment opportunities. This affects the household's economic stability and the child's prospects.

1.6. Community Dynamics - Cultural or Social Factors Impacting Child Education:

- **Limited Community Protection Infrastructure:** With **91.46%** of communities lacking functional Child Protection Committees and only 1.50% of children accessing Child Help Line services, there is insufficient community-level support for children's safety, which impacts their learning environment.
- **Gender-Specific Vulnerabilities:** Cultural norms may also affect school attendance, with 9.67% of boys and 8.06% of girls dropping out, suggesting economic and potentially gender-based biases that hinder consistent educational attendance.

- **Unsafe Community Conditions:** Some children report feeling unsafe in their neighbourhoods due to environmental hazards, lack of safe spaces, and other risks, with **64.10%** identifying “no safe places to play” as a concern, potentially affecting their ability to engage in educational or recreational activities that support learning and development.

Key Findings

Here is a summary of key findings from the Vulnerability Assessment Report:

1. Educational Vulnerabilities:

- **High Dropout Rate:** An estimated **29%** dropout rate among children aged 6-18 years, with girls having a slightly higher rate than boys. Financial pressures contribute, as **59.72%** of the dropout children are engaged in work.
- **Birth Certificate Gap:** **11.46%** of children lack birth certificates, potentially limiting access to public services, school enrolment, and legal identification.
- **Early Childhood Education Access:** **36.52%** of children have missed out on ICDS, which affects school readiness and cognitive development.
- **Special Needs Education:** While disability prevalence is low (0.74%), children with disabilities face significant barriers, including lack of specialized support and resources.

2. Health and Nutrition Concerns:

- **Nutrition Gaps:** Over one-third of children lacked early childhood nutrition services, impacting growth and health.
- **Healthcare Access Issues:** Only **27.52%** of sick children received medical treatment, often due to financial constraints.
- **Workforce Health Risks:** Children engaged in work face potential health risks, including exposure to inadequate nutrition and unsafe conditions.

3. Child Protection Challenges:

- **Low Awareness of Rights:** Only **4.10%** of children are aware of their rights, leaving many vulnerable to abuse and exploitation.
- **Underreported Abuse:** Most of the abuse cases go unreported due to fear or lack of knowledge about reporting mechanisms.
- **Lack of Support Services:** Limited access to functional Child Protection Committees (CPC) (8.54%) and low usage of Child Helpline services (1.50%) limit timely interventions.

4. Community and Household Dynamics:

- **Economic Instability:** Financial hardship is prevalent, with many households unable to fully support children’s education or nutrition needs. A significant portion of households rely on food assistance.
- **Migration Patterns:** Economic pressures drive seasonal migration, with a small portion of families requiring long-term relocation.
- **Gender and Safety Concerns:** Cultural norms and lack of safe spaces impact children’s school attendance and neighbourhood safety.

5. Educational Infrastructure and Resources:

- **School Resources and Accessibility:** Limited school infrastructure, teacher shortages, and inadequate resources for special needs students affect educational quality and inclusivity.
- **The providing eggs:** The teachers of the schools are afraid of showing the exact number of drops as they are receiving the Eggs from Govt for two days and remaining 4 days they are receiving from Azim Premji Foundation, along with the chicki and Banana.
- **Taking new villages:** The project is ready take new villages, replacing the villages wherever drops are less.

Recommendations

Based on the assessment findings, here are some tailored recommendations:

A. Program Development; Targeted Actions to Address Vulnerabilities

1. Nutrition Programs:

- **Expand Early Childhood Nutrition:** Increase access to ICDS for children less than 6 years to ensure nutritional and cognitive development. Supplement this with school-based nutrition programs like mid-day meals to reduce malnutrition risks.
- **Nutritional Supplement Drives:** Partner with local health services to offer regular Vitamin supplements and food packages, particularly for low-income families, to address gaps in essential nutrients.

2. Child Safety and Protection:

- **Awareness and Training on Child Rights:** Implement educational workshops to raise awareness of Child rights among children, parents, and teachers. Partner with local NGOs to distribute easy-to-understand information on identifying and reporting abuse.
- **Enhance Reporting Mechanisms:** Promote the use of Child Help Line services and establish anonymous reporting mechanisms. Train teachers and community leaders to recognize and respond to abuse and exploitation cases.
- **Create Safe Spaces for Children:** Develop safe community centres and play areas to provide secure recreational spaces. This helps mitigate neighbourhood safety concerns and gives children safe environments to engage in social activities.

B. Community Interventions: Family and Community-Based Strategies

1. Economic Support for Families:

- **Livelihood Diversification Programs:** Partner with vocational training centres to offer skill-building programs for families, particularly young adults. These programs should focus on sustainable income-generating skills, such as tailoring, small-scale farming, or trade skills.
- **Social Assistance and Savings Programs:** Introduce financial literacy workshops and promote community savings groups or micro-finance initiatives to build financial resilience and reduce reliance on child labour.

2. Strengthen Community Child Protection Committees:

- **Empower Local Protection Committees:** Provide training and resources to establish functional CPC within communities. Engage community leaders to foster a protective environment and encourage reporting of abuse and exploitation.
- **Youth and Parent Engagement Programs:** Organize regular community sessions to address cultural biases, reinforce the importance of education, and tackle gender-specific vulnerabilities. Use these sessions to build community support for children's education and well-being.

3. Improve Community Health Access:

- **Mobile Health Clinics and Regular Health Check-ups:** Set up mobile clinics to offer periodic health screenings, vaccinations, and nutritional support in rural and under-served areas. Collaborate with local health departments to make healthcare more accessible to vulnerable families.
- **Health Awareness Campaigns:** Promote health and hygiene practices through school programs and community campaigns to improve overall child health and reduce preventable illnesses.

C. Education Infrastructure Improvements

1. Enhance School Accessibility:

- **Establish Local Schools or Transportation Options:** Where schools are far, consider opening smaller satellite schools or provide subsidized transportation options. This can help reduce dropout rates and absenteeism, especially among girls and young children in rural areas.
- **Expand Enrolment and Retention Programs:** Implement incentives, such as scholarships or free school supplies, to encourage enrolment and reduce dropout rates, especially among low-income families.

2. Special Education and Disability Support:

- **Develop Inclusive Learning Environments:** Invest in resources for children with disabilities, including accessible classrooms, sensory aids, and specialized teaching staff. Ensure these facilities are available in mainstream schools.
- **Teacher Training for Special Needs:** Train teachers on inclusive practices and adaptive teaching methods to better serve children with disabilities and improve their educational experiences.

3. Improve Learning Resources and Teacher-Student Ratios:

- **Increase School Funding for Resources:** Allocate funds to ensure classrooms have essential resources such as textbooks, learning materials, and internet access. Provide additional funding for schools that lack basic facilities.
- **Recruit and Train More Teachers:** Address teacher shortages by recruiting qualified staff and provide training on handling large classes. Aim for a balanced teacher-student ratio to enhance learning outcomes.

Conclusion

The Vulnerability Assessment conducted in Kalaburagi highlights critical socio-educational challenges affecting children, including high dropout rates, inadequate nutrition, child labour, and limited access to healthcare, early education, and child protection services. Economic hardship, lack of birth certificates, and barriers for children with disabilities further compound these issues, limiting children's access to education and safe environments.

The recommended actions aim to address these vulnerabilities comprehensively.

These interventions are expected to foster a safer, more supportive educational environment, reduce dropout rates, and empower families economically, creating a lasting impact on children's well-being and future opportunities. By strengthening the foundational pillars of health, education, and protection, this program envisions a more resilient and equitable community for the children of Kalaburagi.
