

**RURAL INTEGRATED DEVELOPMENT
SOCIETY (RIDS)**

ANNUAL REPORT 2023-24

Annual Report for the Year 2023-2024

➤ HIV/AIDS Prevention Project Kambadur:

RIDS has planned to incorporate the following strategies in the current year, in the current year we formed different monitoring Strategies in the community members they monitor day to day project activities. Our organization was capacitating the community to good work and enhances good leadership to accomplish our goal. As per SNA Recommendations, HRG validation and CGA and RAT PU will made efforts by adopting different strategies to reach our achievement.

Strengthening Community committees i.e., Project steering committee, Clinic Advisory committee, Peer Educators performance committee, DIC Management committee and Crisis response committee are to be strengthened in Program planning and implementation and review in a systematic approach.

The visible changes were noticed in the attitudes of the HRGs in regard to reporting to RMC /Testing centers; their confidence levels were also increased which help them to approach to Govt. Sponsored schemes in an enabling environment created by the NGO. The cohesiveness was developed among HRGs; Hence their participation in all project designed programs aimed at their development was increased. With the improved knowledge levels of PEs; Task committees which were able to organize condoms promotional activities; advocacy and lobbying with different stake holders like Police, Doctors, Dist. Legal Servicers authority, Revenue, Welfare and Education Departments etc., for availing services from all line departments.

In regard to current year Strategies, we would like to highlight on creating sensitization among HRGs to make optimum use of Government facilities for improving the health scenario of the HRGs. The activity designed for mobilizing HRGs will be helpful to them to only Project offered services to need health needs and non-sexual health needs of the community. The Strategies worked out are based on the actual need of different typologies in different sex workers FSW/MSMs also community is taken services freely on all government provided clinics, health facilities and other services.

Appropriate monitoring systems help the Program on track. And implementing monthly action plan quarterly action plan PEs to PM level.

- Continue to on Identifying New HRGs and Bring them in to service fold.
- E.g.: - Using virtual network and existing community network etc.
- Population size estimation / mapping

- More Focused on risk prioritization
- CBS would continue by Focusing Positive partner and their Sexual Networks and Clients, who found reactive in CBS and Negative report in SA-ICTC.
- Community led advocacy and lobbying and liaison with various line departments will enhance knowledge and understanding about various grass root level issues related to sex workers and PLHIVs and thereby responding to them through strategic decisions.
- Correct and consistent use of condoms is ensured with a special focus on the high-risk areas,
- Significant expansion and access to condom outlets through appropriate NGOs
- The abilities and capacities of the FSWs and MSMs would be enhanced with the support for ensuring appropriate home / community/ institutional based quality care and support services.
- Decreasing HIV/STI by providing clinical services.
- Improved Knowledge and awareness on Sexual diseases.
- Strengthen TB screening during outreach.
- Differential Approach/ service Package to be Prepared & followed
 - New HRGs who do not want to be a part of PU
 - List out them and provide services
- All target population are provided with quality health services and referral
- We are the challenge of HIV prevention PLHAs partner test and implement of PLHAs sexual network analysis.

The visible changes were noticed in the attitudes of the HRGs in regard to reporting to RMC /Testing centers; their confidence levels were also increased which help them to approach to Govt. Sponsored schemes in an enabling environment created by the NGO. The cohesiveness was developed among HRGs; Hence their participation in all project designed programs aimed at their development was increased. With the improved knowledge levels of PEs; Task committees which were able to organize condoms promotional activities; advocacy and lobbying with different stake holders like Police, Doctors, Dist. Legal Servicers authority, Revenue, Welfare and Education Departments etc., for availing services from all line departments.

In regard to current year Strategies, we would like to highlight on creating sensitization among HRGs to make optimum use of Government facilities for improving the health scenario of the HRGs. The activity designed for mobilizing HRGs will be helpful to them to only Project offered services to need health needs and non-sexual health needs of the community. The Strategies worked out are based on the actual need of different typologies in different sex workers FSW/MSMs also community is taken services freely on all government provided clinics, health facilities and other services.

➤ HIV/AIDS Prevention Project Kambaduru:

▪ Achievements Last year's Work Progress -2023-2024

- We achieved 100% of 1st time ICTC tests out of 1664 HRGs and achieved 1664 100 % of, 2nd time ICTC Tests out of 1544 HRGs 100%.
- We achieved 100% of 1st time RPR tests out of 1678 HRGs and achieved 1678 100 % of, 2nd time RPR Tests out of 1558 HRGs 100%.
- 14 STI cases are identified. Treatment is extending to all of them and ICTC tests are also conducted. And also partner notification done to all to partners.
- Total 382 New HRGs are identified in the year 2023-2024.
- We have tried our best to achieve the Core Indicators of the project.
- Our ORW are using the Form B pictures in a Pictorial book to educate illiterate PEs.
- Increased focus is needed on the partner's treatment of the HRGs affected with STIs.
- Qualitative messaging is an important tool to empower the HRGs to access the services
- Managing and understanding HRGs prejudices is an important factor for the effective project management.

➤ **Knowledge level of HRGs on STI/HIV/AIDS:**

World AIDS Day, Candle Light Day, “International Women’s Day “and “sex workers day” that was organized previous year at the project level, the HRG’s have gained a significant knowledge and understanding about the Safe Sex Practices. The risk analysis message that was passed to the target group sensitized them to restrict to a large extent in practicing oral sex methods with different client groups. Their perception towards lesser risk of oral sex practices have noticeably decreased. They are now much aware about the risk prone adversities that seriously impact their health conditions. The women were given awareness on their rights, women Acts and Governments schemes on how to get the services of government schemes of linkages. Also, the FSWs who were diagnosed as HIV have significantly reduced their sex acts as well as the number of partners.

➤ **Behavior of HRG on Health Seeking Behavior**

It is imperative to delineate that all the community members in our project operational area, in case of any STI complaints, they visit our STI clinics only. The timely and appropriate diagnosis and quality treatment of STIs and reproductive tract infections is ensured with palliative counseling services by the project staff. During the STI treatment and STI complaint the HRGs not participating in sexual encounter with any client and lover, if any force by lover that time they are maximum using condom in sex encounter and also, they look to minimum personal hygiene during the STI and pregnancy. They aware on sexually reproductive health, importance of tubectomy. Nevertheless, in case of general health issues 80% of the KP’S takes the prescription from the Government hospital, and 20% of the HRG’S go to Private Doctors.

In certain situations, when there is no availability of condoms either with the HRG or client or at the outlets in the near vicinity, the HRG’s are purchasing condoms prior to any sexual act with their clients.

➤ **Qualitative functional activities in PU program 2023-2024:**

➤ Group meetings:

in the part of BCC education in the PU program group meeting is key activity to achieve organization goals and objectives, to educate on HIV/AIDS/STI and condom correct and consistent usage, health seeks behavior development in targeted key population and development of referrals and linkages by using IEC material and flip charts in group meeting. In this group meeting activity has been prior to conduct knowledge session to key population. RIDS has been implemented this activity to achieve implementing partner goals and objectives.

➤ Hotspot level meetings:

Hotspot meetings should play key role in overcome at hotspot level problems of HRG's and overcome poor services delivery. It is also one of the platforms to deliver key information regarding HIV/AIDS and this Pertains to hotspot level meeting with 15-20 HRGs by its Peer Educator, supported by ORW. Preferably all hotspots having issues, poor service delivery / crisis etc.

➤ Site level meetings:

This is a site wise Association meeting to develop community mobilization activities. It is purely Alliance activity but PU staff presence also ensures in meeting to carry out crisis issues, social entitlements barriers, and accounts issues of CBG's. all the CBG leaders attended to the meeting with their CBG minutes books and Bank books. It is useful to develop the capacities of savings and credits in community leaders and also it is platform the develop second line leadership in community, by this increase's community participation not just on health but in other community development works.

➤ DIC level meetings:

The DIC level meeting is an intentional programme in PU, it makes the community problems analysis. It is open forum to share and Discuss community problems; it is forum to discuss on enabling environment in DIC and other referral centers, awareness on DIC services, utilization of DIC, Backlogs of referral services. This includes DIC level meeting minimum 2 times, the two meetings with 30-40 community members in a month (and another meeting with the community committee members to generate feedback on the quality of HIV prevention services to the target population. The documentation available in TI includes date and time of meeting, name and signature of participants, topic discussed, decision and action taken and follow up plan.

➤ Weekly Staff Review meetings:

Weekly review meetings should be chaired by the Project Manager of the PU. The meeting should review weekly progress and prepare weekly implementation plan for all staffs and peer educators. Weekly review meeting should plan in convenient place to ORW's and site PE's. Before the Weekly meeting PM has inform to CBO members, PE's and collect the clinical data from ANM, referral slips of RMC/ICTC/ICST for cross check, B format from field level. In during the meeting

review each PE wise core indicator performance like in RMC, ICTC, RPR, Condom distribution, CD4 count, form B reporting, social entitlements and in the review meeting Share ORW's field visit observations with all PEs. Allow community committee representatives to share their observations.

➤ Monthly Staff Review meetings:

Monthly staff review meeting led by Project Director of PU project. The meeting should review monthly progress and prepare weekly, monthly implementation plan for all staffs and peer educators. MEA staff in the project has to share the hotspot / PE / ORW wise individual tracking records and analysis of service delivery. Action points based on the discussion to be shared with all staff including PEs. Monthly review meeting should plan next day of preparing/sending CMIS/SIMS reports. Before the meeting day inform to the whole staff, the participants are in the meeting PM, ORWs, ANM, MEA, PEs. If any other invited Guests. Before the meeting TI collect the data from field data, clinical data, financial data, and Consolidate staff field visit reports observations and Consolidate community committee observations and recommendations.

The ORW's present the chart presentation of core indicators performance, review the gaps and community committee recommendations. Prepare next month plan- outreach, condom, advocacy and linkages and prepare data for District level TI review meeting. TI has conducted 12 Monthly Review meetings in the previous year.

➤ Quarterly Review meetings:

PU conducted 4 quarterly review meetings in the year. Qualitative and Quantitative analysis should prior in every quarterly review meeting, the meeting chaired by the project director. Reviewed as per the agreement quarter achievements and to develop strategies for next quarter.

➤ District TI's Review meeting:

District PUs review meeting should be chaired by PO-TSU, DPM-DAPCU, and Add.DM&HO –ALO. APSACS conducted 6 District level TI's Review meetings in the year of April 2023 to Mar 2024. RIDS-Kambadur has participated in all review meetings to present TI performance related within the period. Sharing's are more valuable in the review meetings to implement project in a successful way.

➤ CGA& Risk Assessment:

This is an imperative activity to assess the vulnerabilities in targeted population in TI programme. The frequency of analysis is every 3 months once. ORW should take the responsibility and get the data from hotspots. Data should be taken from every HRG registered. The analysis helps us to proper outreach plan, facilities priority to HRG's.

The condom gap analysis design as mentioned above is part of micro-planning system aimed at analyzing and reducing the condom gap at the NGO level. The data collection is done by the PE with the support/ help of Outreach Worker.

➤ Stake holder Analysis:

The most important step in creating an enabling environment is a careful analysis of the power structure in which FSW/MSM is involved. This analysis must be peer led in order to be effective. It has to identify, and strategies to address, the various stakeholders who influence FSWs/MSM/TG whether directly or indirectly, positively or negatively. These are the people whose support can help to create an enabling environment for the PU.

➤ Referrals and linkages Development:

Referral means Referral is the process by which client needs are assessed and prioritized to provide assistance and network or linkage means strengthening the link between different service providers to provide better support the client.

➤ Task committees:

Task committees are extremely important in the community project. Committees help us in own up the programme and monitoring and supervision the TI activities and services. TI has formed 6 task committees. Each committee should have different roles and responsibilities. Reviews of committees are an ongoing process of every month.

➤ Advocacy and crisis Issues/management:

Advocacy means “Gathering support for action on a specific issue to bring about change”. Appropriately targeted interventions are essential to preventing HIV transmission and addressing the consequences of HIV/AIDS. In the part of that required to advocacy with - people who have influence over decision makers e.g., community leaders, media, other policy makers. The PU have done one advocacy meeting with local Gundas in April-2023 to Mar-2024 on the basis of HRG’s harassed and violated by them frequently.

HIV/AIDS Prevention Project- Ananthapuramu

▪ Achievements Last year's Work Progress -2023-2024

- We achieved 100% of 1st time ICTC tests out of HRGs and achieved 2098 100 % of, 2nd time ICTC Tests out of 1849 HRGs 100%.
- We achieved 100% of 1st time RPR tests out of 2098 HRGs and achieved 1529 100 % of, 2nd time RPR Tests out of 1946 HRGs 100%.
- 9 STI cases are identified. Treatment is extending to all of them and ICTC tests are also conducted. And also partner notification done to all to partners.
- Total 464 New HRGs are identified in the year 2023-2024. 5 positives found.
- We have tried our best to achieve the Core Indicators of the project.
- Our ORW are using the Form B pictures in a Pictorial book to educate illiterate PEs.
- Increased focus is needed on the partner's treatment of the HRGs affected with STIs.
- Qualitative messaging is an important tool to empower the HRGs to access the services
- Managing and understanding HRGs prejudices is an important factor for the effective project management.

PODF Kotanaka and Kallumadi:

Promotion of Farmer Producer Organizations working since March 2019. RIDS covered Garladinne and Singanamala Mandals. Under this programme Promotion of Farmer Producer Organization (FPO) and Marketing facility, Seed, Fertilizer developed at locally, to arrange backward and forward linkages, to tap effectively the on-going schemes of government departments and arrange for regular credit and other monetary support from banks and other financial institutions.

Mobilisation of Farmers: i) The POPI to undertake a base line survey of the farmers around a particular cluster, commodity, market, processing/ storage units, etc. and they may be mobilized and adequate awareness created for organizing into POs. ii) Existing Farmer Clubs, SHGs, JLGs, Village Watershed Committees, Wadi clusters, Dairy co-operative Societies, inactive PACS, other interest groups, etc. could be considered for organizing them into PO. iii) Monthly meeting of farmers of the selected area would be organized by POPIs to create awareness on concept & functioning of POs and to induce transparency in the functioning of POs.

Preparation of Business Plan: POPI to ensure that a robust business plan including the sources of finance for minimum 5 years is prepared by the PO in consultation with the POPI.

Monitoring: The POPI is required to monitor the project closely and keep NABARD informed of the progress through constitution of a Project Monitoring Committee (PMC) under the chairmanship of DDM. Depending on the size and nature of the project, NABARD may nominate a representative as one of the member of PMC. POPI shall enter data of PO and its shareholder members on the web portal developed by HO, on a real time basis. Release of grant for second & subsequent instalments would be subject to complete & correct updation of data on the digital platform web portal developed by NABARD.

KOTANKA FPO (kotanka village, Garladinne Mandal) : The Kotanka Farmers Producer Organization is a great achievement for the year 2023-24 Turnover cross in Rs0.40 crore for the cmss programme.
